Kalon

Stemming from a belief in the beauty and emotive power of everyday objects, Kalon seeks to deepen our relationship and reverence for the things we live with. Kalon's work maintains a strong point of view informed by American furniture traditions and modernist design, with a focus on elemental forms, natural materials, and versatility. The studio prides itself on its intense attention to materiality, which is at the core of each design. With a commitment to ecologically-conscious, regional production, Kalon partners with small teams of highly skilled, fairly paid craftspeople and uses the highest quality, locally sourced natural materials and finishes. By balancing traditional craft modalities with high-tech precision manufacturing and modern forms, Kalon invites a new chapter of contemporary, sustainable design. Kalon was founded in 2007 by Michael Simmering and Johannes Pauwen and is based out of Los Angeles, California.

The Rugosa Collection

The Rugosa Collection was designed by Kalon founders Johann Pauwen and Michael Simmering who sought to capture the spirit and sensibility of the Rhode Island seaside house for which it's named. A summer home to generations of artists and scholars, Rugosa (*beach rose*) is filled with ample, breeze-filled living spaces configured for conversation, music, and quiet study. Evoking the principals and aesthetics of the modernist movement, the collection embraces straight-forward forms, materials and production processes. Made from broad planks of western sugar pine, bronzed glass and upholstered in Belgian linens with 100% down/feather fill, the pieces are as deeply comfortable as they are sustainable.

The Rugosa Sofa \$8,950

DIMENSIONS

86.5" L x 35" W x 30" H

ORIGIN

Made in Los Angeles

MATERIALS

Beyond Beauty

Kalon (pronounced like ‘Talon’ but with a ‘K’) is an ancient, philosophical concept of ideal beauty that considers moral worth and usefulness as inextricable from aesthetics. When an object is kalon, it is beautiful because there is an inherent goodness that radiates from each detail. The truly beautiful is one and the same with the truly good.

Kalon Studios was founded not only to create products that stimulate and inspire, but to use design for positive change. It’s an inherently optimistic mission, and achieving it is no small feat. For us, it’s the seed of inspiration for every decision we make.

The ways we work

Producing with intention

We don't design to industry standards, we design and develop beyond them. Our pieces and materials meet some of the world's most stringent sustainability standards, but more importantly, they meet our high standards. Kalon views design as part of an ecosystem of impact: from those involved in creating work to the production choices we make, we consider the full picture. Each piece must give as much as it takes both to the environment and to the people involved in creating it.

Championing local craft

Kalon follows a philosophy of local manufacturing. Lumber is sustainably harvested from forests most local to where pieces are made. Similarly, all packing materials are sourced locally. Our intent is to sustain and revitalize the businesses, communities, and woodworking traditions in our communities.

Minding our impact

Our operations follow a small to Batch Size One production model. Within this approach, it is as efficient and cost effective to produce a single item as it is to produce a run of 1,000. In this way, we break from destructive cycles of mass production, overconsumption of resources, and wasteful overproduction. Additionally, every Kalon piece meets an extremely high standard of 90% material efficiency or more. Despite this already industry-leading example, we are continually redeveloping our manufacturing processes.
